

A woman with long brown hair, wearing a light pink shirt and a green wristband, is seen from behind, clapping her hands. She is seated in a green ribbed chair. In the background, another person is visible, and there are tables and chairs, suggesting a conference or summit setting.

APAC Oral Care International Exchange Summit

2020/ 06 / 16 -- 2020 / 06/ 18

Summit Background

With the change of consumption structure and dietary structure of residents, the demand for dental care products will increase day by day, and the potential of consumption growth deserves attention and deep excavation. Promoted by many factors, the dental care products industry has always maintained stable development, and the future prospects of the industry are bright.

The theme of this Summit is to explore the innovative development trend of dental care industry, inviting well-known experts and enterprises to explore their development opportunities together.

Economic, political, technological and other factors continue to drive the development of the industry

Economic Factors

With the continuous improvement of the living standard of consumers, their oral nursing consciousness has been strengthened, turns to use more professional and scientific oral nursing methods. The performance of oral care has been improved gradually. Besides oral cavity care products such as toothpaste and toothbrushes, mouthwash, dental floss, tooth powder and tooth protection have also been increasing rapidly.

Political factors

The Asia–Pacific region has issued many industry standards, including product standards related to toothbrush, toothpaste, toothpowder, oral care fluid, denture cleaners and other categories, to guide the healthy development of the industry. Including the opening of the domestic two child policy and the increase in the number of newborns, the demand for the use of children's dental care products will increase substantially.

RunningTooth.com

Technical factors

With the rapid development of internet, e-commerce and third-party payment, online sales of dental care products have increased year by year, with an average annual growth of about 10% in the past two years. In addition, depending on advanced production technology, its oral care products have begun to realize a series of innovative journeys. Bring more convenient and comfortable oral nursing experience to consumers.
